

BIG LEDUP pro

– the next evolution of the proven BIG LEDUP system

BIG LEDUP pro is based on the trusted BIG LEDUP system – and raises the bar: steel connectors for maximum structural integrity, tool-free bases with patented V-Lock system for a quick assembly, and redesigned cable management for a clean, professional finish. Black powder-coated aluminium profiles and recessed pogo pin contacts reflect an uncompromising commitment to quality – even in the most demanding, high-frequency deployment environments.

■ Maximum Stability

Newly engineered steel connectors join the frame profiles with precision and strength, ensuring reliable stability even in the largest formats.

■ Faster Assembly

The new feet enable a fully tool-free setup. The patented V-Lock system clicks into place quickly and securely – ideal for locations that change frequently.

■ Premium Materials

Black powder-coated aluminium profiles with reinforced steel connectors: robust, precise, built to last.

■ Clean Cable Management

Recessed pogo pin contacts and a redesigned cable routing system ensure an immaculate appearance – no visible cables, no compromises on safety.

■ Sizes & Formats

BIG LEDUP pro is available in 8 widths and 4 heights – a versatile range that covers every room, every stage, and every occasion.

■ Safe Transport

Despite its enhanced rigidity, BIG LEDUP pro remains fully portable. All components are packed in rugged ABS hard-shell cases with custom-fit foam inserts – for safe transport, organised storage, and fast setup even with frequent use.

■ Uniform Illumination

Even, bilateral illumination powered by high-quality OSRAM LED technology with a specially adapted lens design – for brilliant visual impact from every angle.

■ Compatible with BIG UP

BIG LEDUP pro combines seamlessly with the unlit BIG UP system – creating a consistent, unified look across the entire exhibition stand.
